healthy living
cleaner air in every room

The new and improved **Hills® CentralVac1600** offers advanced vacuum technology, making it more powerful, quieter, easier to use and leaves your home cleaner and more hygienic.

Advanced Vacuum Technology

modern, stylish design

Cleaner Air

House dust mites live in our homes. The average square metre of carpet is home to 10,000 dust mites (approx). The most effective way to remove dust is by using a vacuum cleaner. The **Hills® CentralVac1600** transports dust and particles to the main unit by a series of pipes that are installed behind the walls or under the floor of your home.

Easier to use

The **Hills® CentralVac1600** provides you with a convenient solution for a cleaner home. There are no bags to empty or electrical cords to trip over. No heavy lifting and dragging of traditional canister or upright vacuum cleaners from room to room or up and down the stairs.

Features

- Cyclonic operation
- Aesthetic design
- Powerful 240VAC 1600W Motor
- High efficiency particle air filter
- Garage motor utility valve included
- Low maintenance
- Optional floor sweep inlet for high traffic area's (kitchen area)
- Sturdy ABS construction
- Thermal motor protection
- Low noise 69 dB

A **Hills®** central vacuum cleaner delivers flexibility, convenience and low maintenance. It is a more portable solution, which is great for cleaning difficult to reach areas.

The central vacuum system solution adapts to a broad range of cleaning surfaces such as carpeted or tiled floors, furniture and motor vehicles.

Typically installed in a garage or utility room, it provides super quiet operation and a healthier living environment.

The **Hills® CentralVac1600** system is the ideal choice when building your next home and is also suited for existing and or renovated homes. The presence of a **Hills® CentralVac1600** system adds value to your home.
